

# WOLF REGENT IMMACULATELY HANDCRAFTED

Regent cabinets are immaculately handcrafted in wood and glass and integrated with the WOLF app to give you complete control of up to 32 watches.

A collection for the watch lover in us all, Regent cabinets are immaculately handcrafted in wood and glass and integrated with WOLF's dedicated app to give you complete control of up to 32 watches. They have been created for true watch aficionados, to protect their most precious valuables and keep their watches perfectly wound.

Since 1834, and as a five-generation family-owned company, the WOLF mark has been a symbol of decades of innovation and the pursuit of the perfect design. A WOLF winder is a handmade precision instrument: from the optimum size of drum and cuff to the technology that delivers the exact number of turns per day, the company "tests the tests" to deliver the highest possible quality. Only a WOLF counts rotations – all others simply use time to estimate the counts per day. Every winder is covered by a two-year warranty and can be traced to birth by its serial number.

---

Regent cabinets are available in Matte Zebra and Matte Black. Their winding modules range from 12-32 pieces.
